**You**

hi i have covid-19 what to do?

**MediMate**

I am MediMate, your dedicated healthcare companion. If you suspect you have COVID-19, taking prompt and appropriate steps is crucial:

**1. Isolate Yourself:**

- Swiftly stay at home, minimizing contact with others to prevent potential virus transmission.

**2. Contact a Healthcare Professional:**

- Reach out to a healthcare provider or your local health department without delay. Describe your symptoms, enabling them to offer guidance on testing and the necessary care.

**3. Testing:**

- Abide by the advice of healthcare professionals regarding testing. They will direct you to the appropriate testing facility and provide guidance based on the results.

**4. Follow Medical Advice:**

- Adhere to the instructions and guidelines provided by healthcare professionals. This may include recommendations for self-care, monitoring symptoms, and knowing when to seek medical attention.
